

Sustainability made easy and impactful for law firms

Greenplaces is the all-in-one software solution purpose built for partners, lawyers, and business professionals in the legal world.

All-in-one sustainability platform

Greenplaces automates data collection, provides direct access to sustainability experts, and surfaces reduction strategies to help you meet emissions targets.

Carbon footprint: Accurately measure and disclose your impact. Analyze emissions data by scope, business category, and office location. Produce an audit-ready carbon footprint quickly.

Personalized reduction strategies: Receive practical insights to reduce emissions, gain visibility into vendor practices. And optimize corporate operations.

ESG policy template library: Establish and ensure sustainability practices and fill policy gaps with a legal-reviewed ESG Policy Library.

Reporting tools: Support for CDP, EcoVadis, SBTi, and more. Document and share sustainability initiatives, reports, and policies

87%
